

## COMPANY PROFILE

KDF Enterprises, LLC has a proven track record as a provider of services in immediate biohazard cleanup and emergency response recovery following an outbreak of the highly pathogenic avian influenza (HPAI) viral disease, most notably during the outbreak of Avian Influenza in Iowa from 2015 to 2016.

As an experienced emergency response and management company, KDF is capable of mobilizing personnel, equipment, and resources to meet the biohazard cleanup and decontamination needs.

## RAPID RESPONSE

KDF's industry hallmark is its mobilization capabilities. Over a single holiday weekend, KDF provided 800 hazmat-trained and certified employees and equipment across 50 different locations. As a result, KDF delivered a rapid and effective response, providing supervision and management with our own key personnel. Altogether, KDF provided more than \$69,000,000 worth of biohazard hazmat emergency response labor in 12 weeks.

## CUSTOMER SERVICES

KDF made communications with the farmers (whose livelihood had been interrupted) a priority – not because it was required but because, as the biggest stakeholders in the process, it was right to reassure them. KDF often ran extra shifts and brought in additional surge personnel to meet a farm's schedule delivery date.

## KDF CAPABILITIES

Composting – KDF has two USDA Apprentice Composting Subject Matter Experts (SME) on staff supervising our composting teams. KDF responded, mobilized, and successfully completed multiple composting projects direct with USDA during the 2022 outbreak. We are experienced, knowledgeable and stand ready to assist your community.

Cleaning and Disinfecting – KDF has responded to Avian influenza outbreaks by performing: Dry Cleaning, Wet Cleaning, Dry-Ice and Heat Sterilization projects to USDA standards.

KDF developed and executed a new sterilization plan for USDA whereby we wrapped and slow-heated entire barns and purposed a plan for heat treating as a form of disinfecting the facilities. Heat sterilization was already approved but had not been applied to entire structures at that time.

Biohazard Containment Protocols – KDF is familiar with and proficient in Biohazard containment focusing on containing the virus to the hot zone and limiting transference off premise.

## THE KDF ADVANTAGE

Flat Rate Pricing – KDF was one of the first, if not THE first, company to provide a flat rate (\$/SF) to clean and disinfect the affected areas. KDF took over another contractor's site where they were missing the deadline by months and completed the job 90% faster and more than 90% cheaper using half the personnel than the on-site contractor. USDA itself calculated that KDF finished the job 10 months sooner than it would have otherwise been completed while still saving the USDA an estimated \$20,000,000. KDF kept the COR up to date with total and daily costs.

# SAFETY SERVICES

KDF Safety Services, a division of KDF Enterprises, LLC, offers an array of services ranging from safety training to tabletop planning exercises to proactive hazard mitigation.

## TRAINING SERVICES

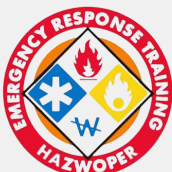

KDF Safety Services offers a standard curriculum staffed by BCSP credential holders, OSHA Authorized Outreach Trainers, and Certified Master Instructors. KDF Safety Services also offers single or multi-day custom training from classroom sessions on specific topics to a fully customizable curriculum to multijurisdictional tabletop preparedness simulations.

KDF Safety Services' faculty includes qualified, credentialed, and certified personnel, who can assist its clients in identifying and addressing weaknesses in their response protocols and preparing for the inevitable agri-disaster. KDF Safety Services' faculty also understands site containment, best practices to identify, recognize, and mitigate hazards, and the most effective protocols for keeping contaminated areas secure within the designated perimeter of the site.

KDF Safety Services offers specialized and focused HAZWOPER 40 and PPE level III training, including training on cross-contamination, decontamination of vehicles, and protocols for entering and exiting contaminated area(s) while keeping responders safe.

### Core Training Capabilities

- HAZWOPER 40
- OSHA 10
- OSHA 30
- PPE Level III
- Cross-Contamination
- Hazard Communication
- Decontamination of Vehicles
- Record Keeping & Documentation

## Safety Staffing

All KDF Safety Services personnel are trained for immediate rapid response. With a network of thousands of vetted safety professionals, KDF Safety Services provides a turn-key solution to your staffing needs, no matter the industry and project size.

## WHY KDF?

Everything KDF Safety Services does is governed by five principles:

**RESPONSIVENESS:** Respond with a sense of urgency to satisfy our client's needs.

**INNOVATION:** Implement creative solutions that wholly satisfy the project's issues.

**SAFETY:** The safety of our employees and the communities where we work is paramount.

**COMPETITIVENESS:** Offer a great value service that balances costs with performance to complete each project at least on time and on budget.

**ETHICS:** Approach each client and project with the highest regard for ethical standards. Honesty and integrity dictate everything KDF does.
